

**Grant Township  
Blight Enforcement**

**Blight Report for the Months of September - 2023**

I sent several registered and regular mail letters this month and have had good success with some responses. Regular letters went to Mark Ward at 1266 North Sd Lk, He called me and felt my glasses were getting weak as he said he had gotten a lot of things removed or relocated at both houses that are in non compliance. I did not see a great improvement but there has been some movement. I will continue to check these locations.

I sent a registered letter to Doreen Rose at 4030 Indian Lk Rd and as yet have had no response and have not gotten the return receipt either, I stopped by her residence Sept 25 and no answer, but, several dogs.

A registered letter was sent to the owner and current resident at 1344 N Sd Lk Rd. I received no response from either person and the resident letter was returned as undeliverable. I stopped by the property Sept 25 and was greeted with language and told that I have been after them since they move in. I told you are right, and the place is a mess. All I heard was that they are leaving and this stuff will be gone when they leave. I told them they will need to clean it up before they leave. Again - language !

Still waiting to hear from the owner of this property.

A registered letter went to Eileen Castanguary-Kendall and the receipt came back from someone I did not know. After talking to Mrs. Kendal and her husband, Vic, I learned that Eileen's daughter is living at the home and did not give the letters to Eileen or Vic. Eileen states the house is going to be deeded in her daughter's name soon and then the daughter will be responsible for the compliance issues. Vic did say if he needs to he will take his trailer and start removing stuff as early as the first week of October. We meet for a half hour and he will get things moving.

Another letter was sent to Andrew Dickman about what appears to be an abandoned boat on a property on Cherokee. No response. Will send registered letter now.

I received multiple complaints about Shawn Sanney's residence. The complaints are that there is a large amount of debris along the side of the garage, there are appliances on the porch and that there is a large pile of leaves or fill that if not being used needs to go to the compost site. This complaint was called to me by a Kevin Hazen who states the dirt has been there for a while now and Shawn states its only been there a few days. Shawn has asked me to show him the Blight ordinance that indicates he can not have appliances in his yard. I have tried to contact him with no luck. I'll keep trying.

Norman Andersen,  
Blight Control Officer
