

## **Grant Township Blight Enforcement**

### **Blight Report for the Month of November, 2024**

1) I received five complaints and I have sent letters to each informing them of their non-compliant blight issues. At this time I am waiting for responses and hope to have these issues resolved by the February TWP meeting.

These addresses are as follows;

A) 795 N Sand Lk. For scattered debris throughout the yard that has been present for some time.

B) 1205 N Sand Lk. For what appears to be various inside items scattered outside.

C) 1123 N Sand Lk. For wood, furniture, trailers and possible non-registered vehicles in yard. And possibly bad living conditions for some of the family. I will be following up on this on regular basis for compliance and improved living conditions.

D) 763 N Sand Lk. For scattered trash around yard and complainant would like to see the grass kept up with also.

E) 785 N Sand Lk. For scattered trash that has been visible for a long time with no attempt to remove these items.

2) A complaint from an unknown address in regards to the property at 1283 Ash Street. For all sorts of items, including grills, lawn mowers, pallets, beer cans, and trash cans. There is a registered vehicle on the property, but it is never moved. The complainant is sure there feral cats and dead animals in the garage. The complainant has been keeping the yard cut to make it somewhat presentable. I spoke to the owner to get this mess cleaned up and he stated that he will get back on it after Doctor's appointment.

**3) I Called Rick Snyder in regards to "The Red Cabin" on N Sand Lk Road to see why he has made no attempt to make the place more presentable while he waits for Spring to start the repairs and replacement of said cabin. He did tell me, over one month ago, that he plans to paint or side the cabin before Winter sets in. There was no answer when I called and I hope to hear from him and get this done before the February TWP meeting or sooner.**

**4) In regards to the mobile home on Cherokee with the travel trailer out front. This has been resolved and the trailer has been moved.**

**5) I had a conversation with a local resident about issues he feels are not being addressed effectively. I tried to assure him I was doing all I could and have not given up on any pending or current blight issues. I will continue to address problems and issues within the TWP and hopefully resolve all that I can.**
