

**Grant Township
Blight Enforcement Report March, 2025**

- 1) I will be following up on all non-resolved issues from last year and watching and hearing from returning residents about new issues that arise.**

- 2) There are several issues on Camino St. and that will be where I put my strongest efforts as the weather changes. That street has been a huge problem for too long and I will be using more sever actions to get it cleaned up. Each one of these residences have had letters sent and registered letters attempted to be sent. So, I will be looking to enforce the issues with citations if one more chance does not get things moving. The addresses in particular are 1808, 1871 , and 1419. (The swimming pool at 1808 has been removed or collapsed and the yard will need some extensive work).**

- 3) I want to encourage all residents to contact me if you see blight issues in the TWP. I depend on telephone calls and reports filed at the TWP office. 989-906-4599**

**Norman Andersen,
Blight Control Officer**
