

**Grant Township
Blight Enforcement Report -April, 2025**

- 1) I was contacted by Paul and Jody Lambert about someone possibly trespassing on their property in Chapple Lake. I informed them that it was me following up on a trailer complaint.**
- 2) I receive two complaints from Jennifer Pantallesco in regards to properties on Carpenter. The first address is 5182 and the next is 5222. These properties have several issues that need to be addressed and I will be sending letters to each of these residences. These complaints were delivered to the TWP hall and forwarded to me.**
- 3) I was informed of possible non-registered vehicles and junk accumulation on Mercer and Lake Street. I will be getting addresses and owner information to send a letter to this spot. My only concern is this address may be in Plainfield TWP. I will be checking to see if this is the case.**
- 4) Also on Mercer I was told that the owner of 21 72 Mercer passed away approximately 6 months ago. There is a silver vehicle in the yard and also scattered junk. I will be getting information from the tax assessor about the owner or next of kin.**
- 5) I got a call from Sharon Baade about a toilet bowl and barrel submerged some distance off shore in Sand Lake. I told her I would look into it but did not know how I could get these things removed. I spoke to a resident that is familiar with these objects and he stated "that stuff has been there for years". I will look into what I can do to make the area safer, as stated these objects are below the surface.**
